UNO SPIN GAME

Game Suggestions not RULES.

Deal six cards to each player. Stack the rest for drawing more cards and there will be a discard stack.

Player to the right of the dealer goes first…next game the winner goes first!

First player spins. If the spinner lands on red, then the player discards a red card if they have one. If the player does not have a red card they draw a card. If a red card is drawn then that card can be played (discarded) and it is the next players turn . If the player does not draw a red card it is the next players turn.

Faster play - discard all the cards of one color from your hand instead of one at a time

Continue this play until all cards are discarded. First person with no cards WINS!

Again…these rules are really not rules, they are suggestions.
